One product launch for your shop and retailer

Your studio is preparing the shop while a retailer requests its file. Approve what each product contains once. Each recipient gets their own piece.

€1,980 · both handovers, without VAT

One range, one language and two products sharing the same facts. One selection, two simple product pages and one retailer-supplied template, up to twelve fields per product. Approve the facts once, then CP360 matches each page against its retailer row.

€990 after signing and €990 within 14 days of full delivery. The brand controls sending and publication. Studio implementation is quoted before agreement. Corrections to the agreed content are included.

If one part is already covered

Selection already approved: one simple page and its buyer row, €1,890. Buyer file alone €1,420. Shop selection alone €1,480. If everything is covered, keep both in-house. One simple page in an existing template costs €1,420 if the selection is settled.

How to check

Select the gift set. Product page DEMO-04 and the matching buyer row must both include the 100 ml bottle and 30 cards. Leave the EAN blank until the brand provides its source.

Same selection and buyer template? Reuse these files. A different retailer requires its columns? Request the matrix alone for €1,420 if it fits the scope. One simple additional shop page costs €1,420 if the choice criterion is settled.

Ordering in two stages. If the €1,420 buyer matrix was paid to CP360 and can be reused unchanged, the additional shop work is €1,000, bringing the total to €1,980. If the €1,480 shop selection was paid first, the matrix adds €500. If the facts change, Jérémie quotes the rework before agreement. Any studio implementation is extra.
